

AMENDMENTS TO THE DRAWINGS

Applicant has amended Figure 10. The features of Figure 10 are present in the original specification and claims. No new matter has been added. Applicant submits a full set of replacement sheets of drawings.

REMARKS

Applicant responds to the *Ex Parte Quayle* Action of 5 May 2008. Please note that the Attorney Docket No. for this case is 7112.19969-DIV and Applicant asks the Examiner to update the records accordingly.

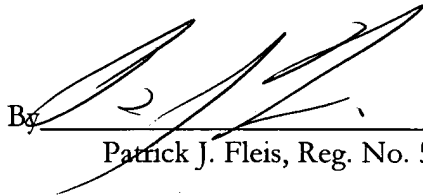

Drawings

The drawings were objected to under 37 CFR 1.83(a) for failing to show every feature of the invention claimed. Specifically, the Examiner stated that collet having a tapered inner surface with the internal threads (24) used with an adapter cylinder (50) claimed in claim 31 is not shown. Applicant has resubmitted Figure 10 as a replacement sheet, to show such features, which were present in the original specification and claims. Applicant has also corrected the numbering of Figure 8 to properly refer to the tube as #58. No new matter has been added with this amendment. Accordingly, every feature of the claimed invention is shown, and allowance of the drawings is respectfully requested.

Conclusion

Applicant has resubmitted Figure 10, which refers to the subject matter of claim 31 to overcome the objection under 37 C.F.R. 1.83(a). No new matter has been added with this amendment. Applicant believes the application is now in condition for allowance, and allowance is respectfully requested. If there are any further matters regarding this application, Applicant respectfully requests that the Examiner contact the undersigned.

Respectfully Submitted,
